statista 

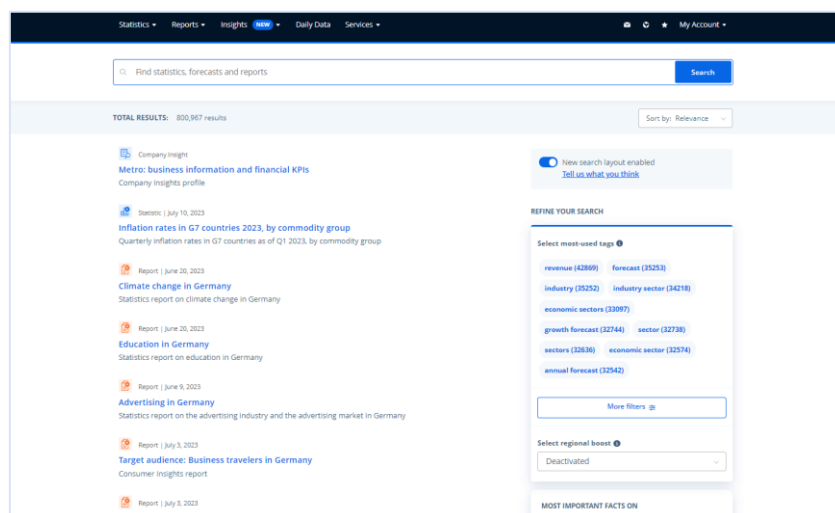

Introduction

Statista is one of the world's leading portals offering access to statistics and studies on 80,000 topics and 170 industries via its website. Statista enables users to quickly and conveniently access relevant market and consumer data and to easily process it. The data is available in English, German, Spanish, and French and is expanded and updated daily.

Search

Statista's search function has been specifically designed to provide users with an easy and efficient way to find the information they need. With features like auto-completion and the display of synonyms and alternative search terms, users can quickly and accurately locate the desired information. Additionally, the search function offers various filter options, including selecting relevant tags, filtering by content type, region, industry, or year, and sorting by relevance or publication date. A regional boost feature ensures that users receive the most relevant search results from their preferred geographic location.

Content & sources

Statista's data comes from two areas: Statista collects relevant market data from third parties and makes it available to its customers in the form of statistics and studies. Sources include government institutions, such as statistical offices and ministries, international organizations, market research institutes, and trade journals. Statista bundles data from a total of 22,500 different sources. Around 50 percent of the portal's content is based on surveys carried out independently by Statista. An international team of experienced analysts develops its own market models, conducts surveys and in-depth analyses, and uses them as the basis for forecasts and key figures for various markets and industries. Statista's own content includes exclusive survey data from the Consumer Insights and market models and calculations which can be accessed in our Market Insights. All available information on a source, such as survey data, methodology, as well as place and date of publication, is listed on the portal.

Download formats

Statistics and studies can be downloaded in various formats. Depending on the type of product chosen, Statista makes the data available to its customers in the form of XLS, PPT, PNG, and PDF files. Thus, the researched statistics can be directly processed and integrated into your own analyses and presentations without any detours.

Rights of use and publication rights

Customers with a Starter Account are granted the right to use downloaded content for commercial purposes.

Customers with a Starter Account do not acquire the right to publish downloaded content. Please ask the Customer Service for more details.

The automated read or extraction of our data is impermissible, including its use for the purpose of training artificial intelligence.

Possible changes

Due to technological development as well as possible changes in the legal, fiscal or economic environment, Statista will occasionally adapt this product data sheet. You will be informed about these changes in due time. If the changes are economically neutral, we assume your consent.

Services included in the Starter Account

The Starter Account grants access to Statista exclusively for one user. The activated user may access the account from different end devices. Any use by multiple employees requires the acquisition of a Professional Account. In the event of unusual usage behavior, Statista reserves the right to block access until the issue is clarified and/or to immediately terminate access.

The Starter Account offers the user access to all basic, premium, forecast, and survey statistics of the German, international, Spanish, and French platform. Unless contractually agreed otherwise, the user is granted unlimited download rights to premium statistics.

The Starter Account enables the user to download basic and premium statistics as XLS, PDF, or PPT files, and as PNG images.

Unless contractually agreed otherwise, the Starter Account subscription is valid for a period of 12 months and, if not canceled prior to expiration of the subscription period, is automatically renewed at the regular monthly price for 12 months.

The total price (invoice amount) is invoiced in one sum when both parties formally enter into the contract. The Starter Account offer is aimed at commercial users. An acquisition by private users is not possible. The purchase process includes confirmation that the purchase is for a commercial user.

Statista will keep the user informed about innovations by e-mail so that the user is able to use the most up-to-date functions of the statistics portal at any time.
